Start of summer field school

EU's start here at 5050

EU 5050 25 May 90
Cleaning of exposed area of site to the south of the southern wall of the house.

EU 5051 132.5N 157.5E 31 May 90 Cindy and Sharon
SW quad of plowzone -- screened

EU 5052 132.5N 157.5 Cindy and Sharon
unscreened remaining PZ

EU 5053 132.5N 160E 31 May 90 George and Van
sw quad of PZ -- screened

EU 5054 132.5N 160E 31 May 90 George and Van
unscreened remaining PZ

EU 5055 130N 157.5E 31 May 90 Kris and Amy
sw quad of PZ -- screened

EU 5056 130N 157.5E 31 May 90 Kris and Amy
unscreened remainder

5057 F90-6 1 June 90 Kurt
clay fill under plowzone -- turned out to have been laid in the sixties during the excavation of gravel to the south by Lonestar. A plastic shotgun shell casing convinced us of this. This EU will be used for this feature throughout the season.

⁴⁶
F-91-47 5058N F90-9₅ 4 June 90 Van, Uzzel, Amy
Area S of B.H., N of kitchen, W of T87A, E of line formed by inside of wall of B.H. 19th century fill -- first 4 or 5 inches.

5059 130N 160E 1 June 90
sw quad -- screened PZ

5060 130N 160E 1 June 90
unscreened remaining PZ

5061 140N 160E 4 June 90 Kris and Sharon
eastern 3/5 of PZ -- not screened, this completes a square taken down partially when trenching

EU's 5062, 5063, 5064, 5065, 5066
These are features F90-10, F90-11, F90-12, F90-13, F90-14
respectively -- posts and stain

5067 F90-14 4 June 90 Kurt
Postmost near SE corner of kitchen found at same level of those
believed to be for scaffolding which were excavated in 1987

5068 F90-16 5 June 90 Kurt
Postmold at same level as and near to EU 5067 (F90-14)

472
F-91-58(?)
5069 F90-9 5 June 90 Van, Uzzel, Amy
This is the level below EU 5058 in the same feature. Note that this
feature probably has another feature number from a previous year.

5070 6 June 90 Stone and George
Cleaning of 'tunnel' W of BH.

5071 140N 160E 6 June 90 Sharon and Kris
"Topsoil" that was overlaid with clay in the 60's. It feels good and
humusy, but does not have a definite division from that below - what
we now believe to be sub.

5072 F90-6 6 June 90 Dane and Raul
Interface between clay (EU 5057) and underlying features. Still clay
but 18th century artifacts popping through.

5073 F90-17 6 June 90 Amy
Large square postmold intruding on F90-21 (EU 5077). Fill is mottled
with much darker soil.

5074 F90-18 6 June 90 Van
Large square postmold intruding on F90-21 (EU 5077). Fill is much
lighter than underlying feature.

5075 F90-19 6 June 90 Van
Rodent hole in F90-21.

5076 F90-20 6 June 90 Van
Rodent hole in F90-21

F-91-58(?)
5077 F90-21 6 June 90 Van, Uzzel, Amy
Level 1 of stratum below F90-9. This EU and EU 5082 should be
considered as one unit (the same).

5078 F90-22 7 June 90

Rodent hole in F90-21.

5079 7 June 90
Rodent hole in F90-21. -- no associated Fnum.

5080 7 June 90
Rodent hole in F90-21. -- no associated Fnum.

5081 F89-15 7 June 90 George and Stone
"Tunnel" W of BH.

At this area, last year, a bisection was started of the southern half of this feature. Halfway completed, two test pits were then made in the southern half to get to the bottom. The approach we are taking is to take down the remainder of the southern bisection to the same level as the testpits. This EU is the first 5" of the takedown.

5082 F90-21 7 June 90 Van, Uzzel, Amy
Same as 5077 due to mix-up.

5083 8 June 90 Givens
Widening of trench **to be identified later.**

5084 8 June 90 Stone
Cleanup of T88-A.

5085 F90-7 135N 160E 8 June 90 Dane
Section of 18th century ditch (or footing) appearing in this unit.

5086 F89-15 8 June 90 George and Stone
Layer uner EU 5081 in southern bisection of "tunnel." This is the last layer of the beforementioned takedown.

5087 F90-7 140N 160E 8 June 90 Kris and Sharon
18th century ditch appearing in this square -- not much remaining.
