Troweled feature about 10 cm down. Filled with brick fragments and bone. Shallow, no real shape. Brick concentrated, possibly a pier.

Found a few pipe stems, a few fragments of whiteware, stoneware straight pin, wire bottle glass

main portion of brick is 80cm x 90cm

After removing all bricks, feature is shallow, bowl shaped, irregular.

begin oval shaped feature defined by densely packed brick rubble. Rubble consists of halves & quarters of large hand made brick and smaller bricks.
- big brick piece dimensions: 11cm wide and 7.5cm deep
- small brick piece dimensions 9cm wide and 5cm deep
- some bricks have tan sand mortar on them.
Soil matrix in & around the bricks is a dark brown loam, mixed with small mortar & brick pieces. There are more bricks than soil

14 Liter of dirt - stopped counting after we discovered the robber trench ^{over} wall
